# Introduction

Hello and thank you for downloading "*91 Common Everyday Items that Bring Huge Profits on eBay!"*

My name's Scott Foster and I publish an online ezine called the Niche News Journal where I write about various ways to make money both online and off. One of the ways that I make money is with eBay. I've been selling on eBay for 6 years now and it has proved to be a great source for earning extra income – extra income that anyone with a little initiative can tap into.

But, not a day goes by that one of my ezine subscribers doesn't ask me, "Where can I find hot items to sell on eBay?" In answer to that question I've often advised people to take a look around their own homes and see what products they can find that might sell well on eBay.

But, how do you know if something is worth listing or not? By researching completed auctions, of course. And that's exactly what I've done *for you* in this ebook.

In "*91 Common Everyday Items that Bring Huge Profits on eBay!"* I have already done all the hours and hours of research and compiled a list of common every day items that are hot sellers on eBay.

These are **not** items that are rare or even particularly hard to find – in fact you may even find that you have some of these little treasures laying around in your attic, garage, basement or storage room. But, even if you don't have any of these items in your home, these are items that commonly show up at yard sales, rummage sales, thrift shops, estate sales and even book sales.

Now you'll know **exactly** what to be on the lookout for so when you come across one of these little-known treasures you can pick it up for a song and resell it on eBay for a high profit.

I suggest you print out this report, put it in a 3-ring binder and keep it in your car so you'll have it with you in your travels.

Ok, let's get started...

**Please Note: I'll be updating this report regularly – in fact, even as I write this I'm already doing research on several hot new niches. If you want me to send these to you make sure I have your *good* email address – Click here to sign up for the update list: http://www.overlookedtreasure.com/**

# Cast Iron Skillets (Griswold and Wagner)

These old heavy things are selling like crazy on eBay. Some for HUNDREDS of dollars a piece! I know I have a few of these tossed around the kitchen. Most of what I have, I picked up at those little yard sales down the street! If you have cast iron skillets that are Griswold and Wagner, you can place these items as one of the little known profitable items on your list! The larger the skillet the better the price it will bring. Condition is a big factor but if you find a skillet with a lot of rust you can usually clean it up and bring it back to salable condition.

# Cake Decorating Books

Cake Decorating is huge and just about anything to do with cake decorating will sell on eBay. I know I have a couple of these lying around. Wilton cake decorating books are among the most profitable of these guides and books in lots of 5 or more do particularly well. Keep your eye out for these highly valuable items at your local thrift store or yard sales and make a nice profit!

# Two Color Golf Balls

Several years Karsten, a manufacturer of golfing equipment, started producing 2-Color golf balls for Ping. The balls were manufactured until 1997 when Karsten closed their golf ball manufacturing facility to concentrate on their more lucrative golf club making operation. Today those 2-color balls are highly valued by collectors. Golf balls with gold, silver, wine or black are worth the most. Yellow, orange, white, and blue are more common and will only bring a few dollars.

These 2-color golf balls can still occasionally be found at golf pro shops but your best bet is at thrift shops and yard sales.

Here's a site that lists the approximate value of each color:

# Dealer Manuals for Vehicles (not Chilton or Haynes)

Dealer Manuals for vehicles are hot items on eBay. These are the large manuals published by the manufacturer NOT **Chilton or Haynes.** I could not believe that these old things are worth so much money! Just a stack of old manuals I was about to throw away – some are going for almost $300.00 a piece on eBay.

# Genealogy Books

Those old genealogy books I picked up a few years ago at an old rummage sale are worth HUNDREDS on eBay! I ran across these while doing my spring cleaning, deciding to do a little research on them, and quickly unpacked them from the boxes I had waiting to be thrown out! It's true what they say about one person's trash being another person's treasure!

# Time Life Book Series

*by James Jones*

*(note: Thanks to James Jones for allowing me to reprint his article about Time-Life Books)*

Over the years Time Life has published over 175 book series. However, only a handful have enough value to make them worth buying for resell.

Below are the sets that are worth buying. Remember when dealing with sets that the postage will be significant. Be sure to use calculated shipping when selling and add on a little something extra for the effort. Partial sets are OK to buy IF you know for sure that you can buy the missing books from another seller for a price that still leaves a comfortable profit OR if you have seen partial sets sell in the past. Also, a complete series with a missing index book is normally OK.

Here are the **15 sets** that are worth buying and how much you can expect to get on eBay:

**Australians at War (16 Vol)**
$200.00 + for the full set. Some individual books in the series sell but you are better off listing the entire set. A partial set will sell but at a discounts. The most desired books in the series are

- The Australian Light Horse
- Australians At War Western Front 1917-1918
- North Africa 1940-1942

**The Civil War (28 Vol)**
$150.00+ for the full set. The Civil War series was one of the more successful series by Time-Life BUT make sure you buy the correct series since Time-Life also published 5 or 6 other series of books about the Civil War (Voices of the Civil War, Collector's Library of the Civil War, Shelby Foote's Civil War, etc.) The one you want can be easily recognized by the gray, puffy leather covers.

**World War II (39 Volumes)**
$225.00+ for the full set. Prices drop significantly for partial sets. This is one of the longest and most popular sets by Time-Life. Don't confuse this set with the less desirable *The Collector's Library of World War II*. Also, a collection in mint condition will sell for a premium. One set that was unopened recently sold for $511.00

**The Old West (26 Vol +Index)**
$175.00+ for the full set with index. $150.00+ for full set without index. There have been several different editions of this series published. Make sure you buy a matched set because there are some differences in the covers. The original edition was published between 1973 and 1978. Subsequent editions were published in 1990's. I've not seen any of the newer editions selling in eBay so it is doubtful they will bring the same price as the orginal.

**The Third Reich (21 Vol)**
$150.00+ for the full series. This is another World War II Time Life series but this one is focused exclusively on Germany and the Nazis. This was originally scheduled to be a 21 volume set but the last two volumes (*Empires in the East* and *Homeland Beseiged)* were never published.

**The Enchanted World (21 Vol)**
$100.00+ for full set. This is a very popular series that deals with popular mythology. Each book is devoted to a specific aspect of mythology.

**The Good Cook (28 Vol)**
$150.00+ for full set. This series was published in 1979 and contains a complete explanation about the subject of the book, step by step techniques and recipes. Partial sets and individual books do **not** sell well.

**The Seafarers (22 Vol)**
$100.00+ for the full set. Each volume in this series is bound in navy-blue leather and features a photo on the cover just under the title, which is written in gold.

**Timeframe (25 Vol)**
$100.00+ for the full set. Each volume details the major events that happened in one specific time period in one specific region.

**Vietnam Experience (25 Vol)**
$100.00+ for the full set. There is another set with the same title that contains 37 volumes. Not sure if these are worth buying or not.

**Foods of the World (27 Vol)**
$140.00+ for full set. Each volume represents the cooking techniques and styles used in one specific region. Each book also has a separate recipe binder. As near as I can tell there are 27 books, 27 recipe binders and 3 supplements that include a Kitchen Guide and Index Guide. Thea's a total of 57 books but I have yet to see an auction with all the supplements. As long as you have all 27 books with corresponding 27 recipe binders you should get top dollar.

**Mysteries of the Unknown (33 Vol)**
$140.00+ for full sets. There have been several re-printings of these volumes but the originals were all printed before 1993 so you can tell by the date whether or not a book is an original. Only buy the originals books.

**Library of Curious and Unusual Facts (18 Vol)**
$75.00+ for full sets.

**Myths And Mankind (20 Vol)**
$200.00+ for full sets. This is a fairly recent series that is really gaining in popularity. There are UK and US published version. Either one should command top dollar on eBay but make sure you don't mix sets.

**The Art of Woodworking (25 Vol)**
$125.00+ for full sets. Each volume details specific tools, skills, or techniques used to work with wood or specific things to build out of wood.

# Springbok Jigsaw Puzzles

I picked up several of these at a local garage sale when I got on a jigsaw puzzle kick. I think I paid about $1.00 a piece for them. I was just messing around on eBay and noticed that ONE is selling for well over $100.00!

The ones you want to be on the lookout for are the older puzzles published in the 60's and 70's. You can recognize these by the boxes which are round or octagonal. Most of the others have little or no value.

This is definitely an item to put on your list of highly profitable, little known items!

You can find magazines at just about any yard sale -- usually in a box with a price of $1.00 each. If you find some that could potentially be profitable offer the seller 25 – 50 cents each. And if you don't see any magazines out – Ask! Many yard sellers don't even think to put out their old magazines. Ask if they have any magazines devoted to a specific hobby or craft.

Below are **45 more** magazines that are worth picking up – especially if you can get them for 25 or 50 cents each. If you can get an entire series run or the first issue of any of these magazines then you can comfortable pay more. Just use your own judgment and if possible do some research before spending more then a few dollars for magazines where you are not absolutely sure of the value.

# FM Converters

Are you old enough to remember FM radio converters? They were used in cars that only had factory installed AM radios. You tuned your radio to a certain AM station and the converter would broadcast the FM stations.

Well, today these old FM radio converters are valued by people who drive restored classic cars. They want their car to be in original condition with the factory installed AM radio. But, they still want to listen to FM radio so they buy these old converters which allow them to have their cake and eat it too...
